# What We do

We trade in a variety of markets, employing a variety of strategies and working with a variety of professional experts.

assetspecifics.ltd invests and trades in cryptocurrency, precious metals, oil, and natural gas. Our distinct approach to technology, as well as our focus on AI and ML, set us apart from the competition. Our expert AI and ML tools identify and capitalize on market trends. We offer investors a zero-risk policy with guaranteed returns for their investments with us.

We developed a customized algorithmic approach based on analytical models that identify important information about market fluctuations and allow our expert traders to trade accordingly. In order to maintain stability, our traders primarily place short-term and, in some cases, medium-term bets across various segments in our line of operation.

We support the development of mathematically formalized strategy tools for trading liquid markets and generating large profits in situations where traditional methods would yield modest returns.
